Oblique Cone - 90 degree side

An oblique cone when one side forms a right angle (90 degrees) with the base.

An oblique cone is a cone with its **axis not 90°** from its base. The top and base are parallel and true circles. It can be used as a reducer for offset pipes.

The cross section of an oblique cone cut not parallel to the base is elliptical (the only exception to this is when the cone is cut at the "**subcontrary**" angle).

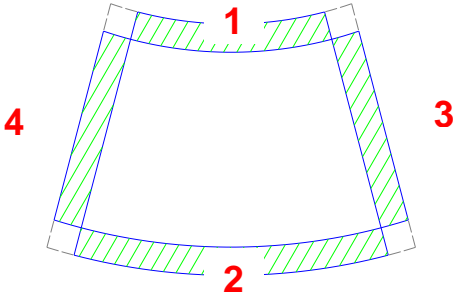

Dimension	Description	Your dimension
A	Base Diameter	
B	Top Diameter	
C	Height	

Units of measure (mm, m, inch, etc):				
My dimensions are measured at the (tick one) :		Inside 	Mean 	Outside
Material Type:		Material Thickness:

Lap Details				
Are overlap allowances to be added to pattern?:		YES <input type="radio"/>	NO (butt joined) <input type="radio"/>	
If YES complete table below				
	Lap Number	Lap size	Notch Angle	
	Lap 1:			
	Lap 2:			
	Lap 3:			
	Lap 4:			
If corners are notched (as shown above) complete Notch Angle column. For example, No notch = 0 or blank, as shown = 90				

Other Settings	
Number of press lines	Number divisible by 4 (default = 24)
